

Contents

<i>Introduction</i>	<i>xvii</i>
---------------------------	-------------

Chapter 1 • mental ray Essentials **1**

mental ray Overview	1
Enabling mental ray	3
Choosing mental ray for an Existing Scene	3
Setting mental ray Preferences and Using the Render Message Window	4
Configuring 3ds Max/Design	5
Exploring mental ray's Design-Related Defaults	6
Using Project Folders	7
Setting System Units	10
Setting Gamma Options	11
Quick-Start Render Settings	21
Introducing the Sampling Quality (Antialiasing) Settings	21
Introducing Final Gather	24
The Bottom Line	28

Chapter 2 • Materials and Maps **31**

Introducing the Slate Material Editor	31
Using the Slate Material Editor	32
Working with Bitmaps	38
Using the Bitmap Proxies Option	38
Using the Bitmap Pager Option	39
Using the mental ray Map Manager	40
Using Bitmaps When Working Remotely	41
Using Project Folders	41
Using Relative Paths and the Resource Collector	41
Using the Asset Tracking Tool	44
Accessing the Bitmap/Photometric Path Editor	45
Editing XRef Paths for Maps and Scenes	46
Working with Materials, Maps, and Colors	47
Introducing the Autodesk Materials	47
Introducing the Autodesk Material Library	48
Introducing the Arch & Design Materials	49
Introducing ProMaterials	61
Introducing the MetaSL Material	61
Converting Existing Materials to Arch & Design	62
Creating Glazing Materials	64
Using Low and High Dynamic Range Image Formats	65
Applying Real-World Scale	68
The Bottom Line	70

Chapter 3 • Light, Shadow, and Exposure Control	71
Using Material Override	71
Introducing Exposure Controls	72
The Logarithmic Exposure Control	73
The mr Photographic Exposure Control	73
The Pseudo Color Exposure Control	80
Working with Light Objects	81
Eight Simple Rules for Lighting Your Scene	83
Start in Darkness.....	83
Use Photometric Lights	83
Use Shadows	84
Use Hardware Viewport Shading to Preview Lighting	84
Use Light Assemblies	85
Use Instance Lights with Common Properties	85
Avoid Ambient Light	85
Use the Light Lister to Manage Lights	86
Understanding Photometric Lights	86
Understanding Shadow Types	87
Working with Light Distribution (Type) Settings	91
Working with Light Color, Intensity, and Attenuation Settings	91
Understanding Shape and Area Shadows	96
Introducing Daylight Systems	100
Introducing the mr Sky Portal	101
The Bottom Line	106
Chapter 4 • Rendering	107
Introducing Backburner Network Rendering	107
Enabling Render Output to Backburner	107
Using Split Scan Lines	109
Correcting Gamma with Split Scan Lines Images	111
Adjusting Network Rendering Advanced Settings	112
Using the Backburner Monitor	113
Using Batch Render	114
Introducing mental ray Proxy Objects	115
Understanding Render Settings	117
Modifying Common Tab Settings	118
Defining File Output Options	118
Understanding the Renderer Tab Settings	120
Understanding the Processing Tab Settings	131
Understanding Translator Settings and Memory Settings	131
Using Distributed Bucket Rendering	134
Accelerating Test Renders	137
The Bottom Line	138

Chapter 5 • Indirect Illumination and Final Gather	139
Defining Direct and Indirect Illumination	139
Understanding Indirect Illumination in mental ray	141
Understanding Final Gather.	146
How Final Gather Works	147
Using a Visual Diagnostics Tool and Final Gather	149
Introducing Final Gather Settings.	150
Using Final Gather Basic Settings	150
Using the Project Points and Divide Camera Path by Num. Segments Option	154
Adjusting Final Gather Advanced Settings	159
Reusing Final Gather and Global Illumination Data	163
Understanding the Final Gather Reuse Modes	164
Understanding the Final Gather Map Options	166
Caching the Caustics and Global Illumination Photon Map.	167
Adjusting an Object's Final Gather Options	168
Producing High-Resolution Images with FG	168
Creating the Low-Resolution Final Gather Precalculation Pass	169
Creating the High-Resolution FG-Freeze Render Pass.	170
Using Batch Render to Create Final Gather Map and High-Resolution Render Passes	173
Using Daylight and Final Gather.	174
Improving Dark Interiors and Entryways	175
Rendering the Sponza Palace Atrium	175
Rendering a Bathroom Scene	181
Producing Animations with Final Gather	185
Animation of Static Scenes	186
Animations of Dynamic Scenes (Animated Objects)	188
The Bottom Line	190
 Chapter 6 • Global Illumination and Caustics	 191
Understanding Global Illumination	191
Defining Photons	192
Understanding Global Illumination Settings.	195
Reusing Global Illumination Data	199
Using Visual Diagnostic Modes with Global Illumination	200
Using Global Illumination	200
Preparing the Initial Render Settings	202
Using Global Illumination with the Sponza Model	213
Using Global Illumination with the Karina Bay Resort Scene	217
Defining Caustics.	220
Understanding Caustics Settings.	220
Using Caustics.	221
The Bottom Line	225

Chapter 7 • Importons and Irradiance Particles	227
Installing the ctrl.ghost Plug-In	227
Introducing Importons	230
Setting Importon Parameters	233
Using Importons in the Sponza Scene	236
Introducing Irradiance Particles	237
Setting Irradiance Particle Parameters	237
Using Irradiance Particles	239
Working with Irradiance Particles	242
The Bottom Line	245
Chapter 8 • Effects	247
Introducing mental ray Lens Shaders	247
Depth Of Field/Bokeh Parameters	248
Distortion Parameters	253
mr Physical Sky Setting	253
Night Parameters	253
Render Subset Of Scene/Masking Parameters	254
Shader List (Lens, Output, Volume) Parameters	255
Gamma & Gain Parameters	256
WrapAround Parameters	256
Understanding Camera Output Shaders	257
Glare	257
HDR Image Motion Blur Parameters	258
Understanding Camera Volume Shaders	259
Beam Parameters	259
Mist Parameters	260
mr Physical Sky as a Volume Shader	261
Parti Volume Parameters	261
Submerge Parameters	264
The Bottom Line	265
Chapter 9 • mental ray for Architecture	267
Using Revit Architecture Models in 3ds Max Design	267
Using the SAT Format	267
Using DWG Exports from Revit	268
Introducing FBX File Import and Linking	270
Using the File Link Manager with FBX Files	273
Comparing Revit Rendering to 3ds Max/Design	274
Revit Materials vs. 3ds Max/Design	275
Introducing the Autodesk Exposure technology	276
Introducing the Lighting Analysis Assistant	277
Using the Light Meter Object	280
Using Nonphotorealistic Rendering Techniques	282
Using Material Override for NPR	282
Using Ambient Occlusion for NPR	284
Using Contour Rendering for NPR	285
The Bottom Line	289

Chapter 10 • mental ray for Design	291
Creating Render Studios	291
Using Environment Maps	294
Using Solid-Colored Environments	301
Using Geometry for Your Environment	302
Using Render Elements	302
Introducing 3ds Max Composite	304
Introducing the mr A&D Render Elements	305
Creating a Basic Composite	306
Working with Solid Models	312
Introducing SAT and the Body Object	313
Understanding Native Inventor File Import	315
The Bottom Line	317
Appendix A • The Bottom Line	319
Chapter 1 mental ray Essentials	319
Chapter 2 Materials and Maps	320
Chapter 3 Light, Shadow, and Exposure Control	322
Chapter 5 Indirect Illumination and Final Gather	325
Chapter 6 Global Illumination and Caustics	326
Chapter 7 Importons and Irradiance Particles	327
Chapter 8 Effects	328
Chapter 9 mental ray for Architecture	330
Chapter 10 mental ray for Design	330
Appendix B • About the Companion DVD	333
What You'll Find on the DVD	333
Projects	333
Plug-Ins	333
Scripts	333
3ds Max Design 2009	333
3ds Max Design 2010	333
Bonus	333
Bonus Videos	334
White Papers	334
System Requirements	334
Using the DVD	334
Troubleshooting	335
Customer Care	335
<i>Index</i>	337
